

# Lab 9 - R Markdown (HTML)

## My First R Markdown

### Introduction

**Markdown** is a very basic and easy-to-use syntax for styling written documents. It's very easy to make some words **bold** and other words *italic* with Markdown. You can even link to FCSIT!

Here is a code chunk and it prints the code and result.

```
set.seed(1)
x <- rnorm(100)
mean(x)
```

```
## [1] 0.1088874
```

*Here is a code chunk but it only print the result.*

```
## [1] -0.1365489
```

Here is a code chunk but it doesn't print anything!!!

Inline text computation

The current time is Tue Dec 28 2:15:01 PM 2021.

```
summary(cars)
```

```
##      speed      dist
##  Min.   : 4.0    Min.   :  2.00
## 1st Qu.:12.0    1st Qu.: 26.00
##  Median :15.0    Median : 36.00
##   Mean  :15.4    Mean   : 42.98
## 3rd Qu.:19.0    3rd Qu.: 56.00
##   Max.  :25.0    Max.    :120.00
```

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
